Measure 6 Deloitte

On April 20, 2018, the Giant Mine Oversight Board (GMOB) received the Deloitte plan to address Measure 6 of the Report of Environmental Assessment and Reasons for Decision Giant Mine Remediation Project (June 20, 2013). This was requested during the teleconference of March 27, 2018.

Disappointingly, the provided plan does not adequately address the proposed methodology for the study discussed during that time. GMOB notes the commitment by the Project Team to host another meeting in this regard on June 11th, 2018. GMOB remains hopeful that, at that time, sufficient information will be provided as to how the case studies will be evaluated in relation to the Giant Mine remediation project, given the variability of governance, financial structure, and geo-political factors from which the case studies will be drawn.

GMOB strongly recommends that Deloitte also thoroughly review and evaluate all past correspondence provided to the Project Team by the organizations participating in the Working Group. It appears that many of those carefully considered recommendations and comments have not been addressed adequately. In GMOB's view this needs to be corrected as many of the interventions are fundamental to the evaluation of the future funding model for the Giant Mine post remediation.

GMOB looks forward to receiving the materials relevant to the June 11, 2018 meeting well in advance, to allow sufficient time for study and comment.

Sincerely,

Dr. Kathy Racher
Chair, Giant Mine Oversight Board
