Giant Mine Remediation Project - Climate Change Report Review, Summary Report & Recommendations

Natalie;

Please find attached a report entitled "Giant Mine Remediation Project - Climate Change Report Review, Summary Report & Recommendations". This independent report was prepared by RFS Energy Consulting & Research Group Inc.

The report was commissioned following the GMRP Working Group session of June 8, 2023. In response to concerns raised during the meeting, the Project Team agreed to hear comments and recommendations from the Parties regarding the implications of climate change for the Project, including Project design and construction, and monitoring and adaptation measures.

The Giant Mine Oversight Board has carefully reviewed the Report and endorses the recommendations contained therein. The Board looks forward to further discussions regarding the implications of climate change for the Project and the Project Team's response to the recommendations in this Report and to those submitted to the Project Team by other Parties.

A handwritten signature in blue ink that reads "D Livingstone". The signature is written in a cursive, flowing style.

David Livingstone
Chair
